

## **Mission:**

Music, Movie, and Radio/TV shows are the best and the most entertaining products ever made in the U.S.A. Since advent of digital multimedia and world wide web, these bubbling entertainment can be easily spread throughout the world as a format of CD/DVD. With full blown curiosity, Kidees.net want to help people recognize which one taste how by providing Sound/Video clips on Web. The contents to be compiled are titles, clips, year, names of major creditors (performers, producers, writers), and how to acquire. Friendly search interface will be developed, and easy downloading interface will be supplied, such as scheduled downloading of multiple clips. The initial phase is focused on the hit music and popular radio show clips only, since sound clips are much smaller than video clips. Healthy development will likely give a power to expand to video clips for Movie and TV shows too. Not only American entertainment, but also foreign entertainment will be incorporated as well. Kidees and Associates are planning to be filed as a non-profit organization for public service, and are looking for funds in order to accomplish the above.
